

# Hydrant Operation & Maintenance

ONE DAY IN-PERSON WORKSHOP

C.E.U. **0.6**

LED BY: TBA

## ABOUT THE WORKSHOP

Hydrants are a critical part of a community's distribution system and firefighting system. An operational understanding is required for firefighters, street cleaners, and water distribution operators. Safe operation of hydrants is emphasized, with special consideration to preventing water hammer. This workshop provides distribution operators an understanding of the impact of hydrant operation on the distribution system, and the role hydrants play not only for firefighting, but also for distribution system maintenance (such as in water main swabbing). The community may have a collection of various hydrants from many different eras, and a detailed understanding of maintenance is required for extending the lifetime of any given hydrant. This full-day workshop provides operational and maintenance theory in the morning and a practical session with hands-on learning in the afternoon.

This workshop includes one day of instruction, classroom material, and Record of Completion.

## PREREQUISITES

None.

### FEES

Workshop Fee: \$280.00

GST: \$14.00

**Total \$294.00**

### **Registration Policy**

Certification and Workshop course registration closes 2 weeks prior to the start date.

No refunds will be provided within those 2 weeks; however, credit may be held for up to 1 year. Students who are absent, without informing ATAP of that absence prior to the course start, will receive a credit, which may be held up to 1 year.

### **Cancellation Policy**

A full refund will be available 2 weeks prior to start, otherwise a credit may be held for the student/organization for up to 1 year.

### **Exam Cancellations During a Course**

Registrants must indicate at the time of registration (whether online or by telephone), the course exams they are writing (both, one, none).

No credits or refunds will be available for exam cancellations once the course has begun.

No examinations can be added during the course.
